SUDHANSHU RANJAN

Muzaffarpur, Bihar 842004 | +91-9153766283 | sudhanshu7536@gmail.com | linkedin.com/in/ranjan-sudhanshu | github.com/sudhanshu-SID | sidcreates.com

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student and full-stack developer with hands-on experience building and shipping production-style web applications end to end. Skilled in React, TypeScript, Node.js, Express.js, REST API design, and SQL/NoSQL databases (PostgreSQL, MongoDB). Delivered three independently built full-stack projects covering authentication, role-based authorization, automated testing, and responsive UI, with one achieving 64/64 passing tests across backend and frontend workflows. Seeking a Software Developer / Full Stack Developer role to apply strong problem-solving and rapid-learning ability to real-world engineering challenges.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, C, Python, SQL, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Framer Motion, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC)

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM

Testing & Tools: Jest, Vitest, Supertest, React Testing Library, Git, GitHub, Postman, Vercel, VS Code

AI & Development: AI-Assisted Development, Prompt Engineering

Operating Systems: Windows, Linux

Languages Known: English (Professional), Hindi (Native), Japanese (Learning)

PROJECTS / SOFTWARE DEVELOPMENT EXPERIENCE

Gadiwalla — Car Dealership Management System | Full Stack Developer **2 Days**

Live: https://gadiwalla-car-dealership.vercel.app/

- Architected an enterprise-grade car dealership platform as an industry-assigned capstone: secure REST APIs (Node.js, Express.js, Prisma ORM, PostgreSQL) with JWT auth and RBAC, plus a responsive React/Tailwind frontend for vehicle search, filtering, and admin stock management.
- Implemented automated test suites with Jest, Supertest, Vitest, and React Testing Library, achieving 64/64 tests passed across backend and frontend workflows.

Get-it-done — Gamified Productivity Application | Full Stack Developer **1–2 Weeks**

Live: https://get-it-done-seven-pi.vercel.app/

- Developed a full-stack productivity app with a personal task-accountability system, including automated penalty countdowns and a strike-resolution workflow, backed by a Node.js/Express REST API and MongoDB.
- Engineered 60fps interactive animations and smooth-scroll UX using Motion and Lenis to increase user engagement.

Ride Wheelz — Vehicle Rental Website | Freelance Developer **1–2 Weeks**

Live: https://ridewheelz.com/

- Designed and launched a responsive vehicle rental web platform for a live client using WordPress, HTML5, CSS3, and Elementor, with custom page layouts and automated rental-rate calculations.
- Built live booking/inquiry workflows and optimized site performance and mobile responsiveness, improving user browsing experience and increasing inquiries.

EDUCATION

B.Tech in Computer Science & Engineering — *Chandigarh Group of Colleges, Landran | CGPA: 7.3* **2023 – 2027**

Intermediate (TSBIE) — *Infant Jesus Jr. Int. College | Percentage: 88%* **2019 – 2021**

Matriculation (CBSE) — *R.P.S. Public School | Percentage: 85.2%* **2018 – 2019**

CERTIFICATIONS

Microsoft Certified: Fundamentals of Generative AI | CS205: Building with Artificial Intelligence | NASSCOM: Digital Edge 101 | Udemy: Git for Beginners

ACHIEVEMENTS & ACTIVITIES

Smart India Hackathon (SIH) 2025: Top 45 teams college-wide at CGC Landran · SIH 2023: Selected for 2nd round · SAP Hackfest: Designed enterprise solution prototypes
